PLANNING A VACATION

TABLE OF CONTENT

Part 1

- Introduction

Part 2

- Install required libraries
- Get location data

Part 3

- Determine venue ratings
- Get trending venues
- View all activity options

Part 4

- Create itinerary

Part 5

- Conclusion

INTRODUCTION

A quick and easy way to identify trending places and venue ratings.

- Vacation involves spending time away from home, as an individual or a group.

- Highlights of the vacation would include places visited and recreational activities engaged in.

- Planning vacation could be daunting since several factors need to be considered simultaneously.
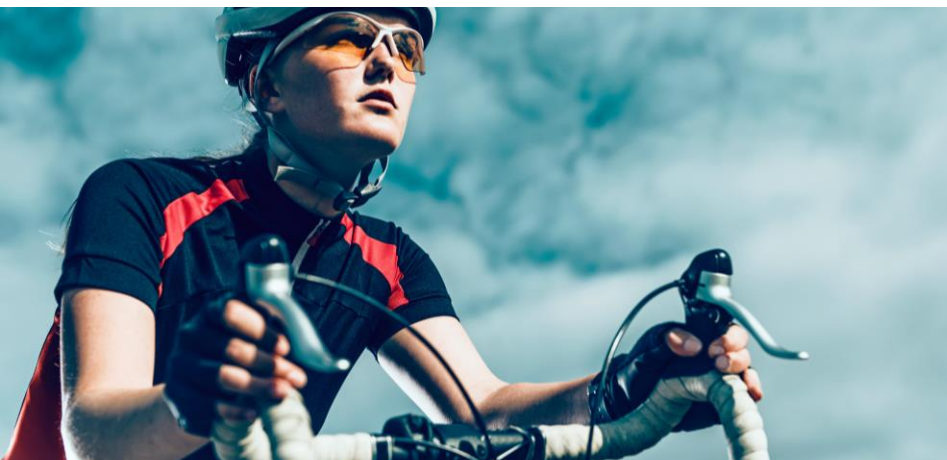

INTRODUCTION (CONT.)

- This program reduces the stress associated with:

  - identifying nearby places of personal interest,

  - getting ratings of different venues, and

  - determining trending places close to a given location.

DATA

The data used in this program is sourced using Foursquare API - a tourist's trusted guide.

Foursquare

- provides real time independent location data to tourists, and

- helps find places of interest.
